PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience building high-scale web applications in fintech and food-tech domains. Architected frontend systems serving 100K+ users, cut page load times by 35%, and automated workflows that eliminated 80% of manual operations. Deep expertise in TypeScript, React, Next.js, Node.js, and REST API design, backed by hands-on security hardening (OWASP, PCI DSS). Seeking to bring platform-scale engineering impact to HungerStation's 35,000+ partner ecosystem.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, PHP, Golang (familiar)

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, Material UI, shadcn/ui, Storybook, Micro-frontends

Backend & Data: Node.js, Express, Laravel, REST APIs, MongoDB, MySQL, PostgreSQL, Firebase

Testing & CI/CD: Jest, React Testing Library, Unit Tests, Integration Tests, CI/CD Pipelines

DevOps & Tools: Docker, AWS (S3, EC2), Linux Administration, Git, Vite, Webpack, Jira, Swagger

Security: OWASP Top 10, PCI DSS Compliance, XSS/CSRF/SQLi Mitigation

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Deputy Manager)

Aug 2021 – Present

Nayapay – Lakson Business Group, Karachi, Pakistan

- Led frontend architecture for 3 core products (Admin Portal, Business Portal, Public Website) used by 100K+ end-users, directly increasing platform adoption by 40%.
- Reduced Admin Portal load time by 35% via virtual scrolling, lazy loading, code-splitting, and optimized rendering, dropping average First Contentful Paint from 4.2s to 2.7s.
- Designed and shipped an onboarding automation engine that cut merchant onboarding from 5 days to 1 day, improving operational throughput by 80%.
- Built a reusable component library (50+ components) with Storybook, adopted across 4 product teams, reducing UI development time by 60%.
- Engineered a Notification Segmentation System with recursive UI rendering and Context API, enabling marketing to target 2M+ users with zero developer involvement per campaign.
- Hardened auth pipelines to PCI DSS and OWASP Top 10 standards, passing 3 consecutive security audits with zero critical findings.
- Automated the Website CMS end-to-end using Node.js and Laravel APIs, eliminating engineering dependency for content updates and saving 20+ engineering hours per week.
- Increased organic traffic by 50% in 4 months through SSR optimization and structured data implementation on the company's public website.
- Mentored 4 junior engineers through structured code reviews and pair programming; 2 were promoted to mid-level within 12 months.

Senior Software Engineer (Part-time Remote)

Apr 2024 – Aug 2024

Carpe Diem – Lendotics (US Fintech Client), Karachi, Pakistan

- Built CRM and banking portals from scratch for a US fintech startup, delivering the MVP 2 weeks ahead of the 10-week deadline.
- Designed normalized relational data models that reduced API response times by 45% through optimized query patterns and indexed lookups.

- Integrated AWS S3 for secure document storage handling 10K+ financial documents with zero data-loss incidents.

Software Engineer

Mar 2021 – Aug 2021

Legend Desk, Karachi, Pakistan

- Delivered 3 full-stack dashboards (analytics, fitness, healthcare) in Laravel and React, serving 5K+ daily active users.
- Reduced codebase complexity by 30% via repository pattern migration, cutting average bug-fix time from 4 hours to 1.5 hours.

Junior PHP Developer

Jan 2020 – Feb 2021

BMSAS Technologies, Karachi, Pakistan

- Built a multi-vendor ecommerce platform processing 500+ monthly transactions with secure payment gateways and zero chargebacks over 6 months.
- Developed a custom real-estate listing engine and WordPress plugins, reducing client page-load time by 40%.

KEY PROJECTS

Nayapay Admin Portal | React, Redux, TypeScript, Tailwind, Material UI, MongoDB, AWS

Enterprise dashboard managing fintech operations and compliance for 100K+ users with role-based access control and real-time data pipelines.

Merchant Arc | React, Laravel, TypeScript, Redux, Material UI

End-to-end merchant onboarding platform automating KYC/KYB verification, cutting onboarding time from 5 days to under 24 hours.

Lendotics CRM | Laravel, MySQL, AWS, REST API

Full-stack CRM for a US fintech company handling loan lifecycle management, customer tracking, and financial reporting across 10K+ records.

Nayapay Website | React, Next.js, Tailwind, SEO Optimization

Revamped the company website with SSR, structured data, and responsive UI – increased organic traffic by 50% in 4 months.

Ecommerce API | Node.js, Express, MySQL, MongoDB

Scalable multi-vendor backend supporting concurrent store management, inventory control, and transaction processing.

Blogging App | React.js, Next.js, Payload CMS

Tech and finance blogging platform monetized via AdSense with optimized SEO and content delivery.

Next Deals | React.js, Next.js, Payload CMS

Next.js affiliate commission platform enabling monetization through content-driven blogging.

EDUCATION

BS Computer Science

University of Karachi

2016 – 2019
